

Environmental Policy

It is the policy of GM Rail Services Ltd that all its operations will be undertaken with full consideration to the impact that they may have on the environment.

This is achieved by conforming to an Environmental Management System (E.M.S.) that meets the requirements of ISO 14001:2004.

GM Rail Services undertakes to:

- Comply with existing legislation
- Comply with appropriate standards and codes of practice
- Monitor our performance against environmental objectives and targets
- Provide employees with appropriate environmental training, information and awareness
- Take reasonable measures to reduce significant emissions, noise and vibration
- Ensure our operational activities prevent pollution
- Effectively communicate our environmental activities to employees, customers, contractors, suppliers and the general public
- Maximise our control of waste
- Ensure that sites are left in a clean and tidy condition

The Environmental Management System and Environmental Objectives as component parts of the Company's Business Management System, shall be reviewed by the Managing Director and the Systems Director at approximately six monthly intervals.

GM Rail Services has a policy of continuous improvement to all components of the Business Management System.

D Whitley - Managing Director
